South Projects

Enhancing Public Safety in Open Spaces

Spokane Public Schools

What: Initiate programming and partnerships to maximize activation of public spaces and increase law enforcement staffing levels

How:

- Coordinate Limited Commission Park Ranger program for supervision of parks and school grounds by sharing resources
- Quadruple the size of the Park Ranger team to serve all neighborhoods
- More frequent park maintenance and care with 50% more maintenance staff
- Facility upgrades for increased usability
- Programming/activations

Adams Elementary with Boys & Girls Club

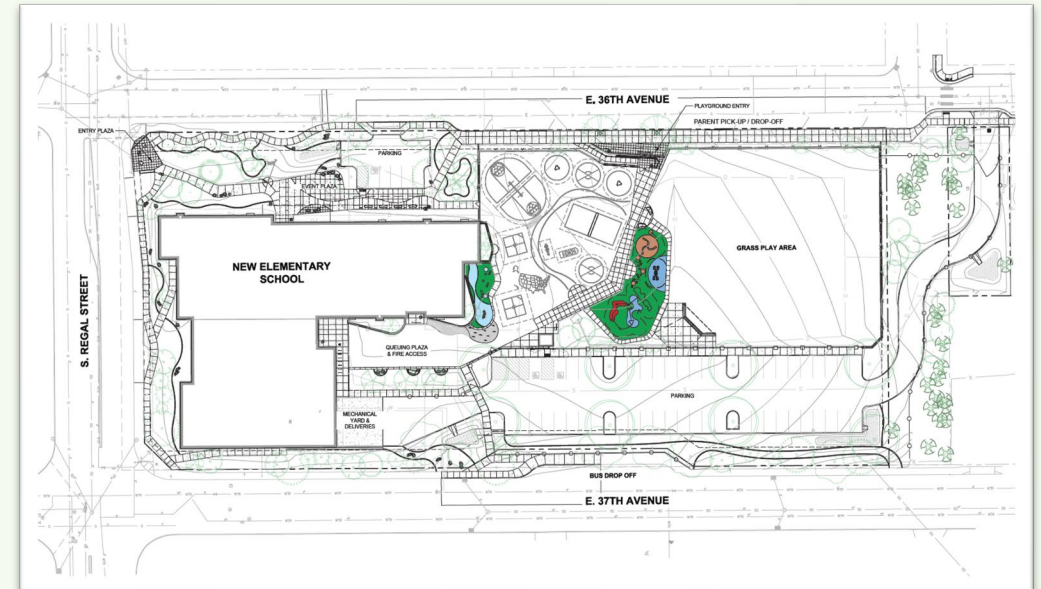

Spokane Public Schools

What: Replace aging Adams Elementary School with a new integrated school and Boys & Girls Club design.

Why:

- Improves school building efficiency and safety to be compatible with 21st century learning
- Creates equitable access for students, staff, and visitors through ADA compliance
- Provides a youth center programming in location of city with limited access and growing population of need

Grant Park Full Renovation

Why:

- In poor to failing condition
- High social and environmental equity zone

What:

- Would be designed with neighborhood input
- May include parking lot replacements, new farmer's market courtyard with utilities, enhanced playground, restroom, splash pad, sport courts, paved pathways, ADA improvements, irrigation, and landscaping.

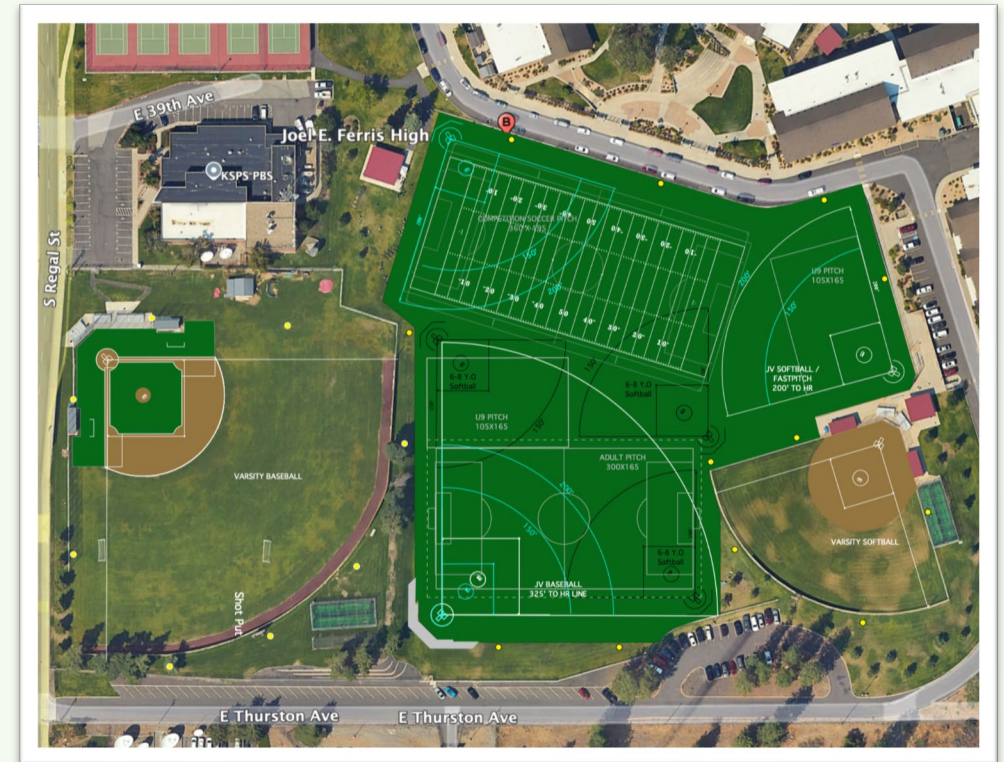

Ferris Sports Complex

What: Three all-weather rectangle fields with lights and all-weather baseball infield on Ferris High campus for use by school teams, Spokane Youth Sports Association and community groups.

Why:

- SYSA will contribute to project cost
- Expands evening and off-season use
- Creates efficiencies by co-locating fields with existing parking and restroom facilities

All Park Restrooms & Playgrounds Upgraded or Replaced

Why:

- Top requested park upgrades in Master Plan
- Improved functionality
- 85+/- restrooms
- 45+/- playgrounds

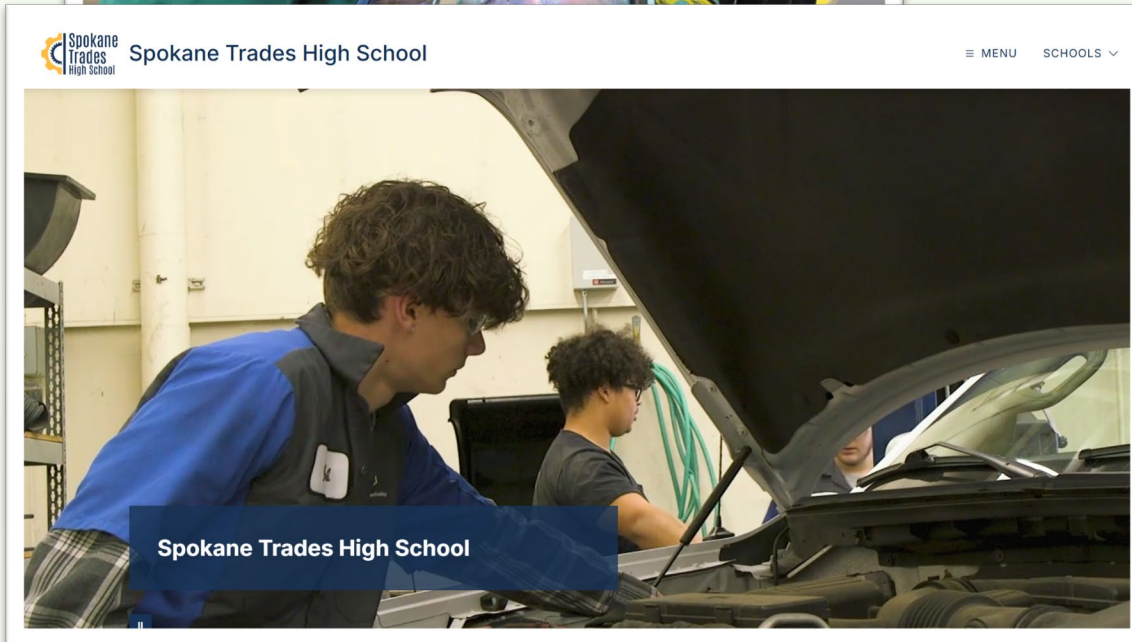

New SPS Trades High School

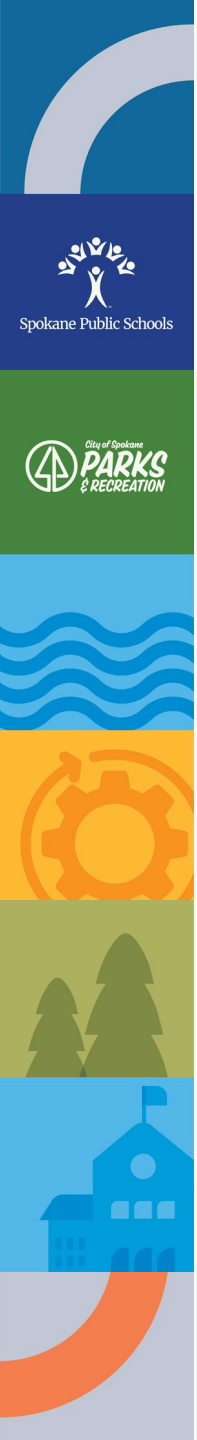

What: New SPS high school on Spokane Community College campus in Chief Garry Park neighborhood to provide full day programming to 9-12 grade students who want an experience focused on Career and Technical Education (CTE).

Why:

- Addresses local workforce demands for careers in the trades
- Aligns with student interest for a full day high school program focused on CTE preparation
- Provides program to enhance integration of career connect learning with local business and industry
- Participating students graduate with a high school diploma and 2-year technical degree
